

MOORING AT FOREFRONT OF CORONAVIRUS (COVID-19)

CORONAVIRUS RESPONSE

Mooring is working to help reduce the spread and impact of the Coronavirus (COVID-19). COVID-19 is impacting business and government operations across the US and abroad, and entities in both the public and the private sector are seeking solutions to mitigate the risk of exposure to this threat for their employees and visitors.

As a leader in emergency response, Mooring's environmental specialists have decades of experience dealing with hazardous threats to assist your business' goal of minimizing the risk of exposure and interruption to business operations.

To prevent contamination, or respond once confirmed exposure to the virus is evident, Mooring will provide the following:

- **Deep Cleaning Protocols that meet and exceed standards set forth by the CDC**
- **Safe Effective Products that are also food safe/child safe**
- **A Proven 3-Part Disinfection Process**
- **Comprehensive Remediation and Decontamination**

All plans and protocols are developed in accordance with protocols from the Centers for Disease Control and Prevention (CDC), Occupational Safety and Health Administration (OSHA), World Health organization (WHO), Environmental Protection Agency (EPA), and American Industrial Hygiene Association (AIHA).

Been There. Done That. Done Right.

Mooring's environmental specialists routinely perform decontamination work for many Industries, and we have decades of experience doing it. Trust our fully trained and certified teams to effectively implement facility cleaning protocols and disinfectant procedures to minimize risk of exposure and transmission.

Mooring's number one priority is the health and safety of our operations at your facility and ours. As standard procedure on all jobs, our employees are committed to following this philosophy and adhering to defined health and safety protocols.
