

Powerful Silence

STAN PARRIS

“There was silence in heaven for about half an hour.” This is dramatic. Heaven fell silent for about half an hour. The final judgment is about to begin and silence replaces the joyful noise of heaven. Up to this point, there has been a lot of noise in heaven, centered on the noise of praise for the Lamb of God. But now, silence prevails.

One present day writer has described silence as a resource as valuable as water. If we are honest, silence makes us uncomfortable — even making us feel awkward. Yet, silence is a powerful thing.

The amazing thing is that in silence God often speaks the loudest. There is silence in heaven for about thirty minutes. Why?

One reason, when the inhabitants of heaven see what is on the scroll of history and what is going to happen on this earth, they are stunned. The judgment of God is about to fall on the earth, and it drives all of heaven to silence.

Quiet yourself today. And in the silence, let God break your heart for our lost world.
